

Inception Date: 1/2005

**STRATEGY OBJECTIVE**

The objective of the Global Balanced strategy is to provide outperformance versus the benchmark over time, while dampening volatility through asset class diversification. The multi-asset class strategy combines high-conviction active management with the diversification of low-cost, passive ETFs.

**OUTLOOK AS OF 12/31/18**

- Global economic growth should continue in 2019, despite headwinds from trade disputes, with positive momentum in the U.S. and mixed economic trends internationally.
- Strong earnings growth in 2018 and the recent market pullback make U.S. valuations attractive amid moderate economic growth.
- European GDP growth should stay positive in 2019, but major E.U. economies are seeing growth slow; while Asia's economic outlook is mixed, Asian markets stand to benefit as trade tensions ease.
- Longer-term U.S. interest rates should reverse some of their recent pullback as investors' concerns over economic growth abate.

**PORTFOLIO POSITIONING AS OF 12/31/18**

- We favor U.S. equity sectors with both cyclical and secular tailwinds, like Info. Tech. and Comm. Services, while avoiding more economically-cyclical sectors, like Industrials and Energy.
- We continue to underweight European equities, where economic growth trends are unlikely to improve in the near-term; we see better international opportunities in Asian equities, where declining relative valuations have improved the region's risk/reward profile.
- Emphasis of short-duration fixed income securities and avoidance of U.S. Utilities and Real Estate equities limit interest rate risk.

**Q4 ATTRIBUTION\***

**Positive Contributors:**

- Overweight
  - U.S. Cons. Staples Equities
  - U.S. Health Care Equities
- Underweight
  - U.S. Energy Equities
  - U.S. Industrials Equities

**Negative Contributors:**

- Underweight
  - U.S. Utilities Equities
  - U.S. Treasury Securities
  - South & Central American Equities

**PORTFOLIO COMPOSITION\***

- **Fritz Porter, CFA**, Partner, Co-CIO, and Portfolio Manager  
19 years of experience, 10 years at WestEnd Advisors
- **Ned Durden**, Partner and Portfolio Manager  
21 years of experience, 12 years at WestEnd Advisors
- **Rob Pharr**, Co-CIO and Portfolio Manager  
41 years of experience, 14 years at WestEnd Advisors
- **Ty Peebles, CFA, CPA**, Senior Investment Analyst  
8 years of experience, 5 years at WestEnd Advisors

## ABOUT WESTEND ADVISORS

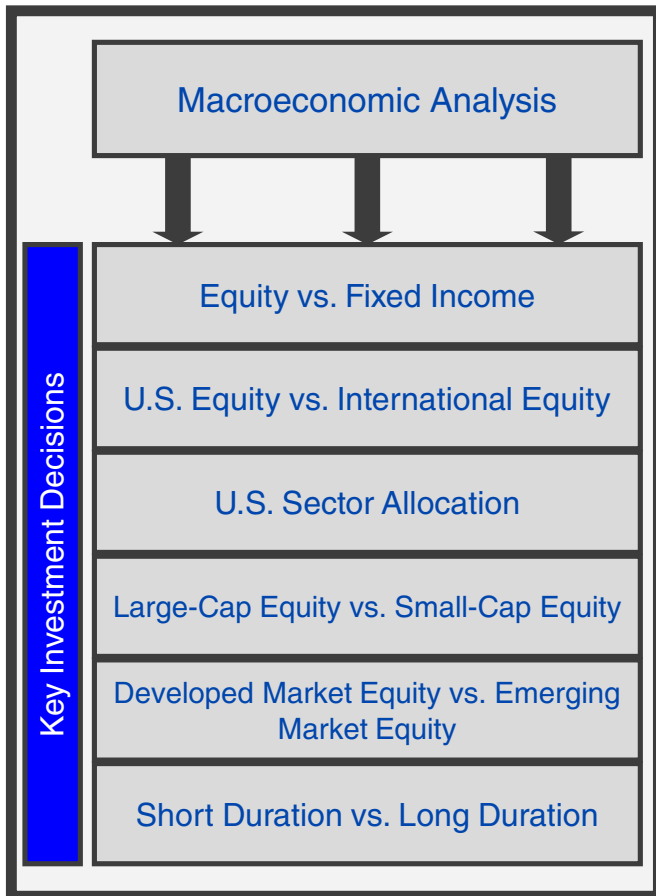

WestEnd Advisors is owned by five partners, all of whom are active in the firm. Our ability to analyze economic indicators, and to know which merit attention, has served our clients well for two decades. This top-down, macroeconomic-based investment approach was first employed in 1996 with our Large-Cap Core Equity strategy and is now applied across all of our investment offerings.

As of December 31, 2018, WestEnd Advisors' total firm assets under management and advisement were \$3.9 billion.\*\* We work in partnership with our clients and are committed to transparency, compliance, and sharing with investors what we know and learn. We are an employee-owned firm and have the independence to make decisions that are in the best interest of our clients.

\* Supplemental information based on the Global Balanced Composite gross-of-fees.

\*\* Total firm assets under management and advisement include \$3.3 billion of assets in Unified Managed Account (UMA) programs for which WestEnd provides model portfolios but has no discretion to effect trades and no supervisory responsibility over the assets in the program. This number has been derived from the most recent information provided by each of the participating UMA programs and may not be current as of the date stated above. This information is included as supplemental information only.

INVESTMENT PROCESS

Economic trends are the winds that drive the direction of the markets. That is why we analyze hundreds of economic indicators to help direct our decisions. Over two decades of experience helps us determine what data merits emphasis and what does not.

We begin the investment process by aggregating more than 200 domestic and international economic measures into a proprietary database. Then we evaluate the data to identify areas of economic strength and weakness in the U.S. and abroad, and invest in 8 to 15 equity and fixed-income ETFs from leading providers.

STRATEGY HIGHLIGHTS

- **Length of track record** Top-down approach since 1996  
ETF implementation since 2005
- **High conviction** Flexibility to deviate from benchmark
- **Risk mitigation** Manage downside protection through geographic allocation and U.S. sector avoidance
- **Tax efficient** Typically low turnover and long-term holding periods

THE IMPORTANCE OF SECTOR ALLOCATIONS

WestEnd actively positions the U.S. large-cap equity allocation of client portfolios in the most economically sensitive U.S. large-cap sectors when it expects strong growth, and transitions to less economically sensitive sectors as growth expectations wane.

## FOOTNOTES AND DISCLOSURES

WestEnd Advisors is an SEC-registered investment adviser. Registration of an investment adviser does not imply any level of skill or training. The firm is an independent investment management firm, 100% owned by its active principals. WestEnd manages both equity and fixed-income assets for individuals and institutional clients.

WestEnd Advisors' Global Balanced Composite includes all discretionary accounts invested in the Global Balanced model except for portfolios managed by WestEnd Advisors in a wrap-fee program. The Global Balanced Composite creation date is December 31, 2004. WestEnd Advisors' Global Balanced Composite is invested in large-, mid-, and small-cap U.S. equities, international equities, U.S. fixed-income, and other assets, all through the use of exchange-traded funds, and/or high-grade money market instruments. Returns are achieved without the use of options, derivatives, or leverage of any kind. Results are calculated daily using the aggregate method, use trade date valuations, and include cash as well as the reinvestment of dividends, interest income, and other earnings, if applicable. Portfolio returns are weighted using beginning of period values plus weighted cash flows. Portfolios and composites are valued daily and are denominated in U.S. dollars only.

The performance shown is based on WestEnd Advisors' Global Balanced Composite which includes all fully discretionary accounts invested in the Global Balanced model except for Wrap-Fee (Wrap) and Unified Managed Account (UMA) accounts. While the accounts in the Global Balanced Composite are invested according to the same model as Wrap and UMA accounts, performance may differ between the Global Balanced Composite and Wrap and UMA accounts due to a variety of factors, including but not limited to: fees assessed by Wrap and UMA sponsors (e.g. wrap fees), Wrap and UMA sponsor- and client-imposed investment restrictions, and WestEnd Advisors' lack of trading discretion over UMA accounts.

Net-of-fee performance results are presented after investment management fees paid to WestEnd Advisors, as well as after brokerage or other commissions actually paid by clients in the management of their investment advisory account, but exclude any deductions for custodial fees. The current management fee schedule, as described in WestEnd Advisors' SEC Form ADV Part 2, is as follows: 1.00% for accounts valued at \$100,000 to \$4,999,999; 0.90% for accounts valued at \$5,000,000 to \$9,999,999; 0.75% for accounts valued at \$10,000,000 to \$24,999,999; 0.65% for accounts valued at \$25,000,000 to \$49,999,999; and 0.50% for accounts valued over \$50,000,000. Fees are negotiable where circumstances warrant.

Past performance is not indicative of future results. It should not be assumed that recommendations made in the future will be profitable. The information contained herein is not intended to be an offer to provide investment advisory services. Such an offer may only be made if accompanied by WestEnd Advisors' SEC Form ADV Part 2.

Effective January 1, 2017, the equity portion of the Global Balanced benchmark was changed retroactive to December 31, 2004 from the MSCI World (Gross) Index to the MSCI ACWI (Net) Index. WestEnd Advisors believes that the MSCI ACWI (Net) more accurately reflects the emerging markets equity component of the Global Balanced investment strategy and better represents the tax withholding on foreign dividends paid on the underlying holdings within the strategy's ETFs. Portfolio management processes, including underlying security selection, are unchanged as the strategy has always had exposure to emerging market securities through ETFs. Further information about the change is available upon request.

The MSCI ACWI (Net) Index, Bloomberg Barclays U.S. Government/Credit Bond Index, and Global Balanced benchmark are used for comparative purposes only. The MSCI ACWI (Net) Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 47 country indexes comprising 23 developed and 24 emerging market country indexes. The total return of the MSCI ACWI (Net) Index is calculated using net dividends. Net total return reflects the reinvestment of dividends after the

deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The Bloomberg Barclays U.S. Government/Credit Bond Index measures performance of U.S. dollar-denominated U.S. Treasuries, government-related, and investment-grade U.S. corporate securities that have a remaining maturity of greater than or equal to 1 year. In addition, the securities have \$250 million or more of outstanding face value, must be fixed-rate, and non-convertible. The Global Balanced benchmark is composed of 65% of the MSCI ACWI (Net) Index and 35% of the Bloomberg Barclays U.S. Government/Credit Bond Index; is shown to reflect the investments in equity and fixed-income securities; and is rebalanced monthly. Benchmark returns are not covered by the report of independent verifiers.

The dispersion of annual returns is measured by the standard deviation of the asset-weighted portfolio returns represented within the composite for the full year. Dispersion is calculated based on gross returns and is not shown when there are five or fewer portfolios, as the calculation is not statistically meaningful.

A complete list and description of all WestEnd Advisors' composites, as well as a presentation that complies with the requirements of Global Investment Performance Standards (GIPS®), may be obtained by phone (888-500-9025) or email (info@westendadvisors.com). Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations is available upon request.

Attribution Analysis is relative to the Global Balanced benchmark and was current as of the quarter specified in this presentation. A complete attribution report is available upon request.

At the end of September 2018, Standard & Poor's and MSCI reorganized their Global Industry Classification Standard (GICS) to create a new "Communication Services Sector." This new sector combined the former Telecommunication Services Sector with media, advertising, and entertainment companies taken from the Consumer Discretionary Sector, and with certain internet and entertainment software companies taken from the Information Technology Sector.

Any portfolio characteristics, including position sizes and sector allocations, among others, are generally averages and are for illustrative purposes only and do not reflect the investments of an actual portfolio unless otherwise noted. The investment guidelines of an actual portfolio may permit or restrict investments that are materially different in size, nature, and risk from those shown. The investment processes, research processes, or risk processes shown herein are for informational purposes to demonstrate an overview of the process. Such processes may differ by product, client mandate, or market conditions. Portfolios that are concentrated in a specific sector or industry may be subject to a higher degree of market risk than a portfolio whose investments are more diversified.

Holdings, Sector Weightings, and Portfolio Characteristics were current as of the date specified in this presentation. The listing of particular securities should not be considered a recommendation to purchase or sell these securities. While these securities were among WestEnd Advisors' Global Balanced holdings at the time this material was assembled, holdings will change over time. There can be no assurance that the securities remain in the portfolio or that other securities have not been purchased. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities presently in the portfolio. Individual clients' portfolios may vary. Upon request, WestEnd Advisors will provide a list of all recommendations for the prior year.

As of December 31, 2018, WestEnd Advisors had \$1.2 million of assets in the Global Balanced Composite. This information is included as supplemental information only.
