LARGE-CAP CORE EQUITY INVESTMENT PROCESS

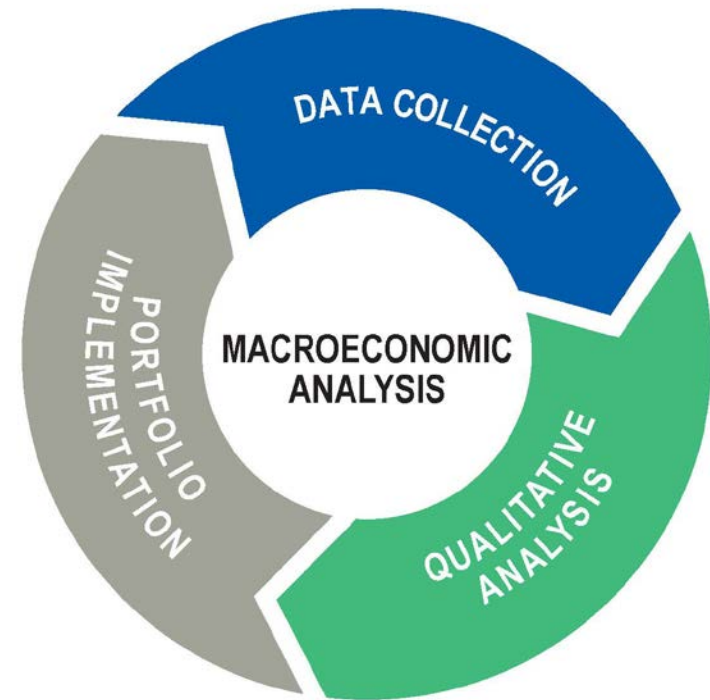

- WestEnd Advisors conducts in-depth analysis of the macroeconomic environment to anticipate areas of strength and weakness in the economy and U.S. equity markets.
- Client portfolios are allocated to sectors of the S&P 500 that we believe will benefit from economic tailwinds, while out-of-favor sectors facing headwinds are avoided.
- WestEnd Advisors then selects market-leading, financially-strong companies that serve as proxies for favored sectors.

EQUITY PORTFOLIO

MACROECONOMIC ANALYSIS

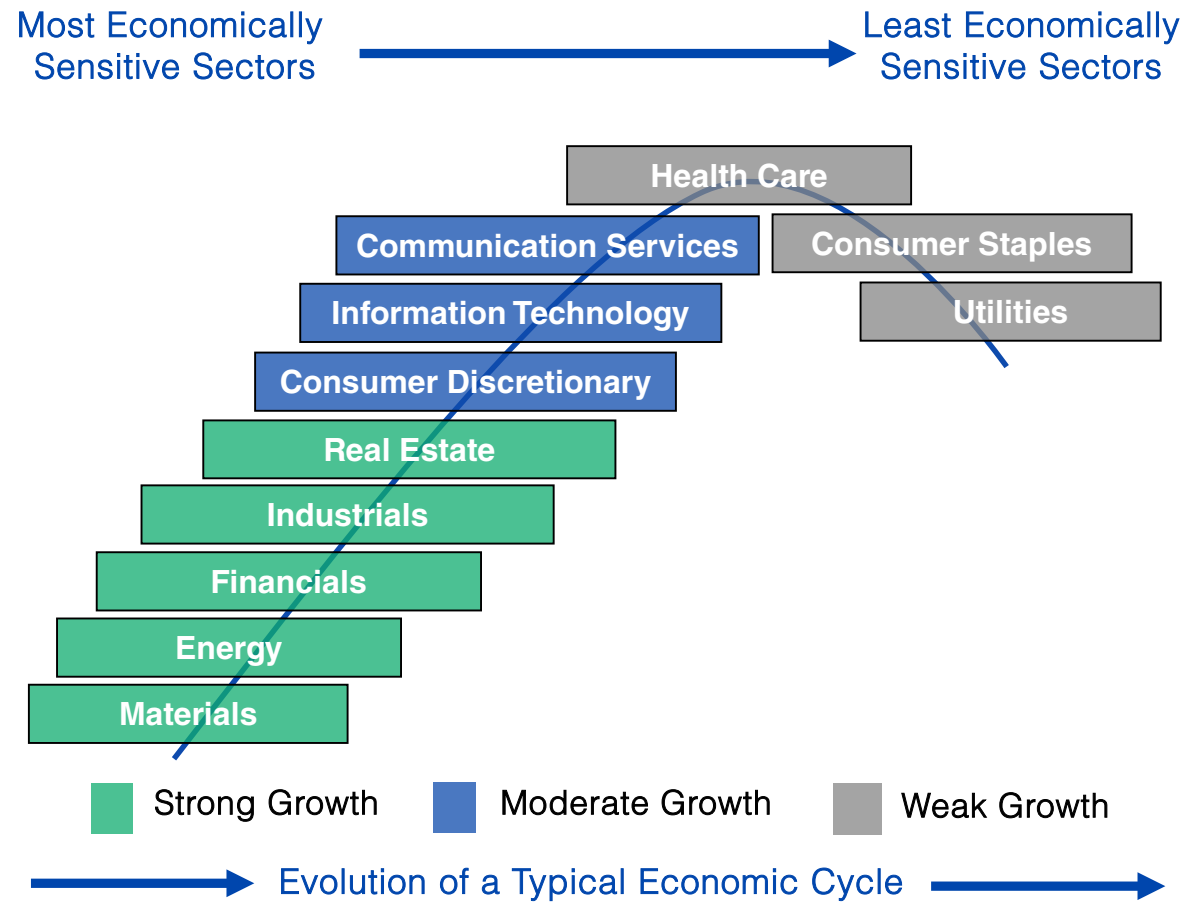

- WestEnd Advisors' proprietary research process begins with the collection of a broad set of publicly available macroeconomic measures. WestEnd aggregates this information in a database of over 200 domestic and international economic readings.
- The investment team determines which economic data is most important given the current economic environment, and then examines that data in a broader context to develop our economic and market outlook.
- WestEnd Advisors uses this qualitative process and our experience analyzing economic trends to build portfolios that capitalize on opportunities in the financial markets.

WestEnd Advisors conducts in-depth analysis of the macroeconomic environment to anticipate areas of strength and weakness in the financial markets and invests accordingly.

SECTOR ALLOCATION

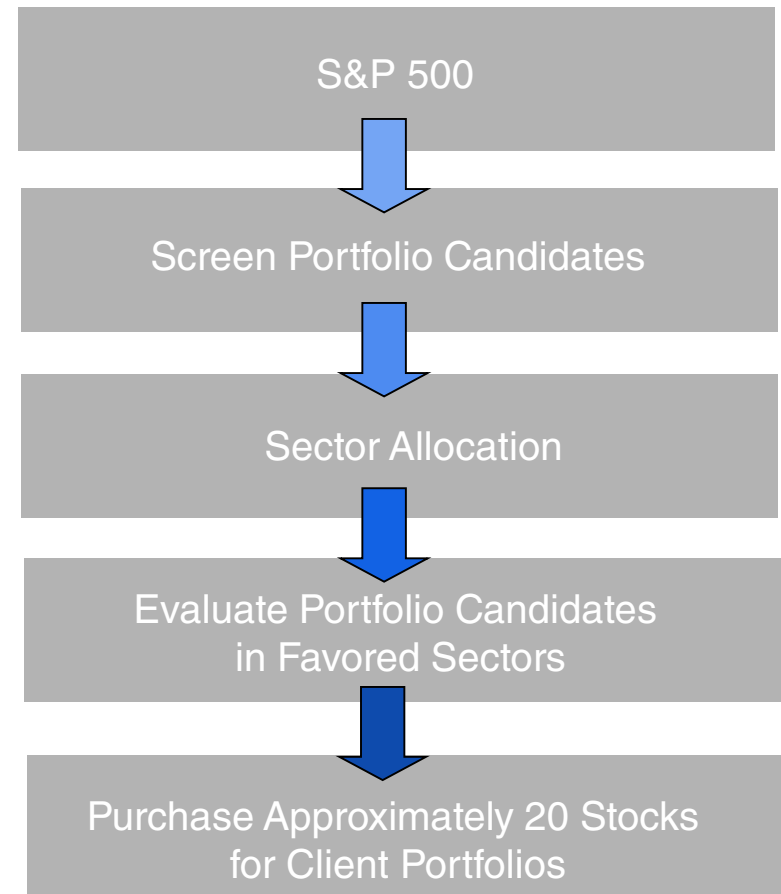

- The path of economic growth is a key driver of S&P 500 sector performance.
- The investment team analyzes recurring cyclical trends and identifies the characteristics particular to the current economic cycle.
- WestEnd actively positions client portfolios in the most economically sensitive sectors when it expects strong growth, and transitions to less economically sensitive sectors as growth expectations wane.
- Portfolios are typically invested in four to five sectors at any one time based on our macroeconomic outlook, but may be invested in more or fewer sectors as conditions warrant.

For illustrative purposes only.

STOCK SELECTION

- Investment universe is typically S&P 500 companies
- Screening Process
 - Capitalization: Average market capitalization 2 – 3x versus S&P 500
 - Quality: Debt-to-equity ratio, return on equity, earnings growth
 - Market Leadership: Competitive position, benefits from secular tailwinds, experienced management team
- Process leads to approximately ten to twelve names per sector, on average, that are subject to ongoing fundamental research
- Review of WestEnd Advisors' sector allocation to determine favored sectors
- Evaluation continues in favored sectors, and approximately 20 stocks are purchased for client portfolios

Fundamental stock research complements and reaffirms WestEnd Advisors' macroeconomic conclusions.

The S&P 500[®] is used for comparative purposes only. The S&P 500[®], our primary benchmark, includes approximately 500 stocks and is a common measure of the performance of the overall U.S. stock market. The S&P 500[®] Index measures the performance of 500 leading companies in the U.S. economy. The S&P 500[®] Index focuses on the large-cap segment of the market, with approximately 75% coverage of U.S. equities. The S&P 500[®] Index is designed to be an indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large-cap universe. The S&P 500[®] Index is a market capitalization-weighted index - each stock's weight in the index is proportionate to its market capitalization. Benchmark returns are not covered by the report of independent verifiers.

The dispersion of annual returns is measured by the standard deviation of the asset-weighted portfolio returns included in the composite for the full year. Dispersion is calculated based on gross returns and is not shown when there are five or fewer portfolios, as the calculation is not statistically meaningful.

Assets Under Advisement includes assets in Unified Managed Account (UMA) programs for which WestEnd provides Model Portfolios but has no discretion to effect trades, and no supervisory responsibility over the assets in the program.
