

Strategy Objective

The Global Equity strategy seeks to provide long-term capital appreciation, while global diversification and active allocations help mitigate volatility. The strategy combines high-conviction active management with the diversification of low-cost, passive ETFs.

Inception Date: January 2005
Top-down approach since 1996

Focus: Global equity

Investments: Long-only, U.S. sector and international region-based equity ETFs from leading U.S. providers; no leverage, derivatives, or options

Risk Mitigation: Manage downside protection through regional allocation and U.S. sector avoidance

Tax efficiency: Low average annual turnover/long-term holding periods

INVESTMENT PERFORMANCE

Returns for periods greater than one year are annualized.

PORTFOLIO POSITIONING as of 6/30/20

- We have continued to shift away from the defensive portfolio positioning we had in place at the start of the COVID-19 crisis, while seeking to balance opportunity against ongoing medical, political, and economic risks.
- We increased economically-sensitive U.S. Financials and Industrials allocations and maintained the Energy allocation established in late Q1, while reducing U.S. Health Care exposure and eliminating the U.S. large-cap Utilities allocation, but we believe continued uncertainty in this period of economic inflection still warrants exposure to defensive sectors.
- Technology-related sector exposures are warranted, in our view, regardless of the exact shape of the economic recovery given the secular tailwinds benefiting these sectors.
- We continue to underweight international equities, given the relative opportunities we see in the U.S. and risks abroad, with a tilt toward Emerging Asia within the international allocation.

GLOBAL EQUITY INVESTMENT PROCESS

We begin the investment process by aggregating more than 200 domestic and international economic measures into a proprietary database. We then evaluate the data to identify areas of economic strength and weakness in the U.S. and international equity markets, and invest in 5 to 10 equity ETFs from leading providers.

THE IMPORTANCE OF SECTOR ALLOCATION

The path of economic growth is a key driver of U.S. equity sector performance. The investment team analyzes recurring cyclical trends and identifies the characteristics particular to the current economic cycle. Portfolios are typically invested in four to six large-cap U.S. sectors at any one time based on our macroeconomic outlook, but may be invested in more or fewer sectors as conditions warrant.

RANGE OF RETURNS BY SECTOR, CAPITALIZATION, AND STYLE*

Owning the right sectors at the right time and avoiding those not in their ideal economic environment offers significantly more opportunity for outperformance, in our view, than allocating to the right equity style or market capitalization range.

WestEnd actively positions client portfolios in more economically sensitive sectors when it expects strong growth, and transitions to less economically sensitive sectors as growth expectations wane.

For illustrative purposes only.

* Sector performance is represented by sectors of the S&P 500® Index. "Large Cap" is represented by the S&P 500® Index. "Small Cap" is represented by the Russell 2000® Index. "Growth" is represented by the Russell 1000® Growth Index. "Value" is represented by the Russell 1000® Value Index. Data for 2016 excludes Real Estate as a stand-alone sector, which was included in Financials until September 16, 2016. Data for 2018 replaces the Telecommunication Services Sector with the new Communication Services Sector after September 21, 2018, using geometrically-linked total returns to produce a single full-year return, and treats the linked returns as a single sector, due to changes in GICS sector classifications and index rebalancing that occurred as of market close on September 21, 2018.

FOOTNOTES AND DISCLOSURES

WestEnd Advisors is an SEC-registered investment adviser. Registration of an investment adviser does not imply any level of skill or training. The firm is an independent investment management firm, 100% owned by its active principals. WestEnd manages equity securities for individuals and institutional clients.

WestEnd Advisors' Global Equity Composite includes all discretionary accounts invested in the Global Equity model except for portfolios managed by WestEnd Advisors in a wrap-fee program. The creation date of WestEnd Advisors' Global Equity Composite is December 31, 2004. WestEnd Advisors' Global Equity Composite is invested in U.S. large-, mid-, and small-cap equities, international equities, and other assets, all through the use of exchange-traded funds, and/or high-grade money market instruments. Returns are achieved without the use of options, derivatives, or leverage of any kind. Results are calculated daily using the aggregate method, use trade date valuations, and include cash as well as the reinvestment of dividends, interest income, and other earnings, if applicable. Portfolio returns are weighted using beginning of period values plus weighted cash flows. Portfolios and composites are valued daily and are denominated in U.S. dollars only.

The performance shown is based on WestEnd Advisors' Global Equity Composite which includes all fully discretionary accounts invested in the Global Equity model except for Wrap-Fee (Wrap) and Unified Managed Account (UMA) accounts. While the accounts in the Global Equity Composite are invested according to the same model as Wrap and UMA accounts, performance may differ between the Global Equity Composite and Wrap and UMA accounts due to a variety of factors, including but not limited to: fees assessed by Wrap and UMA sponsors (e.g. wrap fees), Wrap and UMA sponsor- and client-imposed investment restrictions, and WestEnd Advisors' lack of trading discretion over UMA accounts.

Net-of-fee performance results are presented after investment management fees paid to WestEnd Advisors, as well as after brokerage or other commissions actually paid by clients in the management of their investment advisory account, but exclude any deductions for custodial fees. The current management fee schedule, as described in WestEnd Advisors' SEC Form ADV Part 2, is as follows: 1.00% for accounts valued at \$100,000 to \$4,999,999; 0.90% for accounts valued at \$5,000,000 to \$9,999,999; 0.75% for accounts valued at \$10,000,000 to \$24,999,999; 0.65% for accounts valued at \$25,000,000 to \$49,999,999; and 0.50% for accounts valued over \$50,000,000. Fees are negotiable where circumstances warrant.

Past performance is not indicative of future results. It should not be assumed that recommendations made in the future will be profitable. The information contained herein is not intended to be an offer to provide investment advisory services. Such an offer may only be made if accompanied by WestEnd Advisors' SEC Form ADV Part 2.

Effective January 1, 2017, retroactive to December 31, 2004, the Global Equity Strategy's benchmark was changed from the MSCI World (Gross) Index to the MSCI ACWI (Net) Index. WestEnd Advisors believes that the MSCI ACWI (Net) more accurately reflects the emerging markets component of the Global Equity investment strategy and better represents the tax withholding on foreign dividends paid on the underlying holdings within the strategy's ETFs. Portfolio management processes, including underlying security selection, are unchanged as the strategy has always had exposure to emerging market securities through ETFs. Further information about the change is available upon request.

The MSCI ACWI (Net) Index is used for comparative purposes only. The MSCI ACWI (Net) Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI (Net) consists of 47 country indexes comprising 23 developed and 24 emerging market country indexes. The total return of the MSCI ACWI (Net) Index is calculated using net dividends. Net total return reflects the reinvestment of dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. Benchmark returns are not covered by the report of independent verifiers.

The dispersion of annual returns is measured by the standard deviation of the asset-weighted portfolio returns included in the composite for the full year. Dispersion is calculated based on gross returns and is not shown when there are five or fewer portfolios, as the calculation is not statistically meaningful.

A complete list and description of all WestEnd Advisors' composites, as well as a presentation that complies with the requirements of the Global Investment Performance Standards (GIPS®), is available upon request by phone (888-500-9025) or email (info@westendadvisors.com). Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations is available upon request.

Attribution Analysis is relative to the MSCI ACWI (Net) benchmark and was current as of the quarter specified in this presentation. A complete attribution report is available upon request.

Any portfolio characteristics, including position sizes and sector allocations, among others, are generally averages and are for illustrative purposes only and do not reflect the investments of an actual portfolio unless otherwise noted. The investment guidelines of an actual portfolio may permit or restrict investments that are materially different in size, nature, and risk from those shown. The investment processes, research processes, or risk processes shown herein are for informational purposes to demonstrate an overview of the process. Such processes may differ by product, client mandate, or market conditions. Portfolios that are concentrated in a specific sector or industry may be subject to a higher degree of market risk than a portfolio whose investments are more diversified.

Holdings, Sector Weightings, and Portfolio Characteristics were current as of the date specified in this presentation. The listing of particular securities should not be considered a recommendation to purchase or sell these securities. While these securities were among WestEnd Advisors' Global Equity holdings at the time this material was assembled, holdings will change over time. There can be no assurance that the securities remain in the portfolio or that other securities have not been purchased. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities presently in the portfolio. Individual clients' portfolios may vary. Upon request, WestEnd Advisors will provide a list of all recommendations for the prior year.

As of June 30, 2020, WestEnd Advisors had \$3.5 million of assets in the Global Equity Composite. This information is included as supplemental information only.
