

Strategy Objective

The Global Balanced Strategy primarily seeks capital appreciation over time, but also maintains an objective of capital preservation through asset class diversification. The multi-asset class strategy combines high-conviction active management with the diversification of low-cost, passive ETFs.

Inception Date: January 2005
Top-down approach since 1996

Focus: Global multi-asset

Investments: Long-only, equity and fixed-income ETFs from leading U.S. providers; no leverage or derivatives

Risk Mitigation: Manage downside capture through regional equity allocation, U.S. sector avoidance, and fixed income allocation

Tax efficiency: Low average annual turnover/long-term holding periods

INVESTMENT PERFORMANCE

Source: IDC, WestEnd Advisors. Returns for periods greater than one year are annualized. The blended benchmark for the Global Balanced strategy is 65% MSCI ACWI (Net) and 35% Bloomberg Barclays U.S. Government/Credit Bond Index.

**Based on 5 years ended 12/31/20.

PORTFOLIO POSITIONING as of 9/30/21

- In Q2 and Q3, we made adjustments to and within our allocations to economically-sensitive U.S. sectors in anticipation of a shift from rapid economic recovery to a more normalized expansion.
- In U.S. large-cap equity allocations, we are emphasizing sectors with secular earnings growth drivers, like Information Technology and Communication Services, which we expect will see less deceleration in revenue and earnings growth than more cyclical sectors.
- We have materially reduced portfolio exposure to some of the more cyclical U.S. large-cap equity sectors such as Industrials and Energy.
- We remain underweight international equities, as a whole, and recently reduced exposure to Emerging Asia, moving to an underweight of China, and shifted to an overweight of Developed Asia, where we see near-term economic upside from factors like improved vaccination trends.
- Within our fixed-income allocation, we continue to emphasize shorter duration and investment-grade corporate bonds, where we recently shortened the average maturity of our exposure.

GLOBAL BALANCED INVESTMENT PROCESS

We begin the investment process by aggregating more than 200 domestic and international economic measures into a proprietary database. We then evaluate the data to identify areas of economic strength and weakness in the global equity and U.S. fixed-income markets and invest in 8 to 15 ETFs from leading providers.

WestEnd Advisors claims compliance with the Global Investment Performance Standards (GIPS®)

THE IMPORTANCE OF SECTOR ALLOCATION

The path of economic growth is a key driver of U.S. equity sector performance. The investment team analyzes recurring cyclical trends and identifies the characteristics particular to the current economic cycle. Portfolios are typically invested in four to six large-cap U.S. sectors at any one time based on our macroeconomic outlook, but may be invested in more or fewer sectors as conditions warrant.

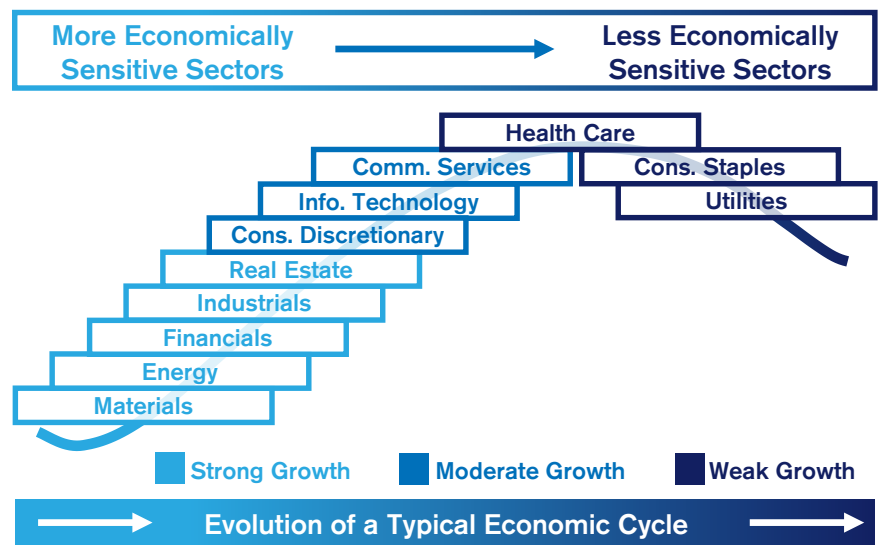

RANGE OF RETURNS BY SECTOR, CAPITALIZATION, AND STYLE*

Source: Bloomberg, WestEnd Advisors

Owning the right sectors at the right time and avoiding those not in their ideal economic environment offers significantly more opportunity for outperformance, in our view, than allocating to the right equity style or market capitalization range.

WestEnd actively positions client portfolios in more economically-sensitive sectors when it expects strong growth, and transitions to less economically-sensitive sectors as growth expectations wane.

For illustrative purposes only.

* Sector performance is represented by sectors of the S&P 500® Index. "Large Cap" is represented by the S&P 500® Index. "Small Cap" is represented by the Russell 2000® Index. "Growth" is represented by the Russell 1000® Growth Index. "Value" is represented by the Russell 1000® Value Index. Data for 2016 excludes Real Estate as a stand-alone sector, which was included in Financials until September 16, 2016. Data for 2018 replaces the Telecommunication Services Sector with the new Communication Services Sector after September 21, 2018, using geometrically-linked total returns to produce a single full-year return, and treats the linked returns as a single sector, due to changes in GICS sector classifications and index rebalancing that occurred as of market close on September 21, 2018.

FOOTNOTES AND DISCLOSURES

WestEnd Advisors is an SEC-registered investment advisor. Registration of an investment adviser does not imply any level of skill or training. The firm is an independent investment management firm, 100% owned by its active principals. WestEnd manages equity securities for individual, institutional and wrap clients. Total firm assets include all discretionary assets managed by WestEnd Advisors.

WestEnd Advisors' Global Balanced Composite includes all discretionary accounts invested in the Global Balanced model except for portfolios managed by WestEnd Advisors in a wrap-fee program. The Global Balanced Composite creation and inception date is December 31, 2004. WestEnd Advisors' Global Balanced Composite is invested in large-, mid-, and small-cap U.S. equities, international equities, U.S. fixed-income, and other assets, all through the use of exchange-traded funds, and/or high-grade money market instruments. Returns are achieved without the use of options, derivatives, or leverage of any kind. Results are calculated daily using the aggregate method, use trade date valuations, and include cash as well as the reinvestment of dividends, interest income, and other earnings, if applicable. Portfolio returns are weighted using beginning of period values plus weighted cash flows. Portfolios and composites are valued daily and are denominated in U.S. dollars only.

The performance shown is based on WestEnd Advisors' Global Balanced Composite which includes all fully discretionary accounts invested in the Global Balanced model except for Wrap-Fee (Wrap) and Unified Managed Account (UMA) accounts. While the accounts in the Global Balanced Composite are invested according to the same model as Wrap and UMA accounts, performance may differ between the Global Balanced Composite and Wrap and UMA accounts due to a variety of factors, including but not limited to: fees assessed by Wrap and UMA sponsors (e.g. wrap fees), Wrap and UMA sponsor- and client-imposed investment restrictions, and WestEnd Advisors' lack of trading discretion over UMA accounts.

Net-of-fee performance results are presented after investment management fees paid to WestEnd Advisors, as well as after brokerage or other commissions actually paid by clients in the management of their investment advisory account, but exclude any deductions for custodial fees. The current management fee schedule, as described in WestEnd Advisors' SEC Form ADV Part 2, is as follows: 1.00% for accounts valued at \$100,000 to \$4,999,999; 0.90% for accounts valued at \$5,000,000 to \$9,999,999; 0.75% for accounts valued at \$10,000,000 to \$24,999,999; 0.65% for accounts valued at \$25,000,000 to \$49,999,999; and 0.50% for accounts valued over \$50,000,000. Fees are negotiable where circumstances warrant.

Past performance is not indicative of future results. It should not be assumed that recommendations made in the future will be profitable. The information contained herein is not intended to be an offer to provide investment advisory services. Such an offer may only be made if accompanied by WestEnd Advisors' SEC Form ADV Part 2.

Effective January 1, 2017, the equity portion of the Global Balanced benchmark was changed retroactive to December 31, 2004 from the MSCI World (Gross) Index to the MSCI ACWI (Net) Index. WestEnd Advisors believes that the MSCI ACWI (Net) more accurately reflects the emerging markets equity component of the Global Balanced investment strategy and better represents the tax withholding on foreign dividends paid on the underlying holdings within the strategy's ETFs. Portfolio management processes, including underlying security selection, are unchanged as the strategy has always had exposure to emerging market securities through ETFs. Further information about the change is available upon request.

The MSCI ACWI (Net) Index, Bloomberg Barclays U.S. Government/Credit Bond Index, and Global Balanced benchmark are used for comparative purposes only. The MSCI ACWI (Net) Index is a free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 49 country indexes comprising 23 developed and 26 emerging market country indexes. The total return of the MSCI ACWI (Net) Index is calculated using net dividends. Net total return reflects the

reinvestment of dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The Bloomberg Barclays U.S. Government/Credit Bond Index measures performance of U.S. dollar-denominated U.S. Treasuries, government-related, and investment-grade U.S. corporate securities that have a remaining maturity of greater than or equal to 1 year. In addition, the securities have \$250 million or more of outstanding face value, must be fixed-rate, and non-convertible. The Global Balanced benchmark is composed of 65% of the MSCI ACWI (Net) Index and 35% of the Bloomberg Barclays U.S. Government/Credit Bond Index; is shown to reflect the investments in equity and fixed-income securities; and is rebalanced monthly. Benchmark returns are not covered by the report of independent verifiers.

The dispersion of annual returns is measured by the standard deviation of the asset-weighted portfolio returns represented within the composite for the full year. Dispersion is calculated based on gross returns and is not shown when there are five or fewer portfolios, as the calculation is not statistically meaningful. The 3-year ex post standard deviation is calculated based upon gross returns.

A complete list and description of all WestEnd Advisors' composites, as well as a presentation that complies with the requirements of the Global Investment Performance Standards (GIPS®), is available upon request by phone (888-500-9025) or email (info@westendadvisors.com). Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations is available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Strategy Advisory-Only assets include assets in Unified Managed Account (UMA) programs for which WestEnd provides Model Portfolios but has no discretion to effect trades, and no supervisory responsibility over the assets in the program.

Attribution Analysis is relative to the Global Balanced benchmark and was current as of the quarter specified in this presentation. A complete attribution report is available upon request.

Any portfolio characteristics, including position sizes and sector allocations among others, are generally averages and are for illustrative purposes only and do not reflect the investments of an actual portfolio unless otherwise noted. The investment guidelines of an actual portfolio may permit or restrict investments that are materially different in size, nature, and risk from those shown. The investment processes, research processes, or risk processes shown herein are for informational purposes to demonstrate an overview of the process. Such processes may differ by product, client mandate, or market conditions. Portfolios that are concentrated in a specific sector or industry may be subject to a higher degree of market risk than a portfolio whose investments are more diversified.

Holdings, Sector Weightings, and Portfolio Characteristics were current as of the date specified in this presentation. The listing of particular securities should not be considered a recommendation to purchase or sell these securities. While these securities were among WestEnd Advisors' Global Balanced holdings at the time this material was assembled, holdings will change over time. There can be no assurance that the securities remain in the portfolio or that other securities have not been purchased. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities presently in the portfolio. Individual clients' portfolios may vary. Upon request, WestEnd Advisors will provide a list of all recommendations for the prior year.

As of September 30, 2021, WestEnd Advisors had \$42.3 million of assets in the Global Balanced Composite. This information is included as supplemental information only.
